PROFESSIONAL SUMMARY

Computer Applications graduate (July 2026, CGPA 7.980, A+) with hands-on experience building Salesforce Apex/LWC applications and Java Spring Boot + React full stack projects. Comfortable with REST API integration, backend debugging, and secure data handling. Seeking an entry-level Full Stack or Salesforce Developer role to apply strong CRM and web application development fundamentals.

SKILLS

Salesforce: Apex, Lightning Web Components (LWC), SOQL, SOSL, Named Credentials, JSON Parsing

Full Stack: Java, Spring Boot, React, REST APIs, JavaScript, HTML, CSS, MySQL, Git, Postman, Python

Practices: Agile/Scrum, input validation, role-based access control, CI/CD (GitHub Pages)

Soft Skills: Communication, Teamwork, Time Management, Problem Solving

PROJECTS

SkyPulse — LWC Weather Dashboard

2026

- Delivered a real-time global weather experience by designing a custom Lightning Web Component (LWC) bound to live weather data.
- Enabled reliable third-party data retrieval by engineering an Apex Controller with HTTP callouts, parsing JSON from an external REST API.
- Eliminated hardcoded-credential risk by implementing Salesforce Named Credentials in place of static endpoint URLs and auth tokens.

WorkForge — HR & Payroll Management Platform

2024

- Streamlined HR record-keeping for employees, departments, and salaries by building REST-based CRUD APIs with Spring Boot and MySQL.
- Cut manual data-lookup time for HR staff by designing a React dashboard with sortable tables, search filters, and modal forms.
- Enforced least-privilege access by adding authentication and role-based permissions using Spring Security for HR vs. admin roles.
- Reduced invalid submissions by adding client- and server-side input validation, verified using Postman and tracked via Git commits.

DevFolio — Personal Developer Portfolio

2023

- Established a fast, professional online presence by building a fully responsive portfolio site in React with smooth client-side navigation.
- Kept the live site continuously current by deploying to GitHub Pages with a CI/CD pipeline that auto-publishes on every Git push.
- Improved organic discoverability and accessibility by applying on-page SEO and adding a persisted dark/light theme toggle.

EDUCATION

Bachelor of Computer Applications — Graduating July 2026 | Tilak Maharashtra University, Pune 2023 – 2026

CGPA: 7.980 (Grade A+) — Final examinations completed May 2026

Java Full Stack Developer Training | SevenMentor Institute, Pune

2024

- Completed hands-on projects using Spring Boot, React, MySQL, and Git.
- Practiced Agile development including sprints, standups, and project demos.
